Recycling & Waste
310 Allen Road, Suite 201
Carlisle, PA 17013

Phone: (717) 240-6489
Fax: (717) 240-5337
Email: recycling@cumberlandcountypa.gov

1. Generator Information

Generator Name _____ Type of Business _____

Tax I. D. Number _____

Mailing Address _____ Site Address (if different) _____

City _____ State _____ Zip Code _____

Contact Person _____ Telephone Number _____ Fax Number _____

2. Inventory of wastes you want to dispose of at this collection event

Please complete and return the attached waste inventory sheet(s) with this application, listing the waste items you will bring to the collection event. Instructions for completing the waste inventory sheet are included. Make additional copies of the inventory sheet if needed.

Only wastes that have been pre-registered and approved will be accepted at the collection event. **You are limited to no more than 2,200 pounds of waste at this event. Radioactive materials, explosives, infectious medical wastes, certain poisons, very reactive wastes, and unknown wastes are not accepted.**

3. Certification for VSQGs a SQGs

Note: This page must be completed and submitted with the application if you are disposing of VSQG or SQG waste at this event. You must retain status as generator of the waste.

State and federal hazardous waste regulations limit the use of household hazardous waste collection programs to very small quantity generators (small business hazardous waste generators that generate less than 100 kilograms of hazardous waste each month) and small quantity generators (small business hazardous waste generators that generate between 100 and 1,000 kilograms of hazardous waste each month). Businesses that generate more than this amount must use a licensed hazardous waste hauler to manifest and transport their waste. Therefore, we are requesting that you sign the following certification before disposing of your waste at the collection event:

I certify that my business qualifies as a Very Small Quantity Generator or Small Quantity Generator as defined above. I understand that I must pre-register before I can drop off my wastes at the collection event. I also understand that only the types and quantities of wastes listed on the attached Inventory Sheet(s) will be accepted for disposal at the collection event. Finally, I understand that the state, local government or hazardous waste contractor does not assume liability for my wastes, and that future liability remains with my business.

Instructions For Completing Waste Inventory Sheet

1. **Item Number:** Number each item (or category group of items) you want to dispose of at the collection event. Each item should have an individual number on its container as reference. The container number should correspond to the completed inventory sheet(s).
2. **Waste Description:** Describe, in as much detail as possible, wastes that you want to dispose of at the collection event. The description should include the chemical and trade name, how you use the material, physical state (i.e., liquid, solid, sludge, gas), chemical characteristics (e.g., flammable/ignitable), and chemical constituents and percentages from the label or material safety data sheet (MSDS). When listing waste quantities, be accurate as possible. Please avoid mixing your wastes together.
3. **Quantity:** List the quantity of waste you want to dispose of at the collection event. As a rule, list liquids in gallons and solids and sludges in pounds.
