Parcel ID ( xx-xx-xxxx-xxx )	Begins with ▼	<input type="text" value="XX-XX-XXXX-XXX"/>
Parcel Suffix	Begins with ▼	<input type="text" value="XX00001"/>
House Number	Begins with ▼	<input type="text" value="123456"/>
Street Name	Begins with ▼	<input type="text" value="Smith"/>

If different political subdivisions have the same street number and street name (e.g. 1 Main Street, Carlisle and 1 Main Street, Camp Hill) you will get both.

Note: With both the House Number and Street Name, you have a "drop down" box that allows you to select a more *restrictive* search. For example, selecting (or leaving as default) "Begins with" for House Number and entering 21 in the data field will return all properties in the County whose street address begins with 21. This would include 21, 211, 210, 2198, etc. If you select "Equals" and 21, you would only get properties with a street address of exactly 21.

If you receive an error message, recheck your spelling. Then try leaving off the road type (e.g. Road, Lane, Drive). Note that this is a more general query and will increase the number of returns - you will have to look through them for the property of interest. For example, a combination of "1" and "Main" will return 1 Main Street, 1 Main Road, 1 Main Drive in every political subdivision in the County.

If you live on a street with *directionality* as part of the name (e.g. North Pitt Street), only put the major street name (Pitt Street) in the search block.

If you leave off the house number, you will get a listing for *all* properties on the referenced street.

Alternatively, you can enter the Parcel Identifier of a specific property in the indicated block. Since the Parcel Identifier uniquely identifies a tax parcel, please leave the Street and House Number fields blank.

3. The search result will look like the following.
