

CUMBERLAND COUNTY CONSERVATION DISTRICT

45th ANNUAL TREE SEEDLING SALE

Thursday, April 20 9 am - 5 pm

Friday, April 21 8 am - 12 pm

**Cumberland County Conservation District Office
310 Allen Road, Carlisle PA 17013**

Exit 44 (Allen Road exit) off I-81, located on Allen Road,
between I-81 and Ritner Highway (Rt. 11), across from Sheetz

DRIVE-THRU PICK UP ONLY

The tree sale will be a drive-thru event only. We ask that all customers stay in their vehicles when you arrive at the tree sale and staff will ask your name, and items that you pre-ordered will be placed in your vehicle. Pre-orders will be the only items available during the two-day event. If any extras are available, they will be sold 12-1 PM on Friday.

You will receive a postcard as a reminder of the pickup dates, times, and location.

ORDER DEADLINE- MARCH 24, 2023

- | | |
|--|--------------------|
| • Two and Three Year Old Bare Root Seedlings | • Flowering Bulbs |
| • Apple Tree and Pear Tree Packs | • Wildflower Mix |
| • Cherry Tree | • Blueberry Plants |
| • Tree Shelters | • Wood Stakes |

Due to limited availability of some species, we encourage you to order early. If we reach the supply limit for a certain species, we may have to cut some orders off before the March 24, 2023 order deadline. If this happens, we will contact you.

Groundcover Note: Unfortunately, we will not be selling a groundcover this year but will continue to research a replacement for future sales. The Myrtle we usually sell is not native and we were unable to find a replacement at a reasonable price.

The District reserves the right to substitute a different size seedling for any species pending availability and adverse growing conditions.

The District cannot guarantee the success rate of bare root seedlings, just as our suppliers cannot guarantee seedling survival rates.

The District is not responsible for seedlings not picked up by 12:00 pm, April 21st.

Descriptions, pictures and order forms are available on the District website: www.cumberlandcountypa.gov/CD

No orders will be accepted via the internet, a check must accompany all orders.

Any questions, call the Conservation District office at (717) 240-7812 or e-mail: conservationdistrict@cumberlandcountypa.gov

DESCRIPTIONS

COLORADO BLUE SPRUCE: Will reach 6 ft. in 8-9 years starting with three year seedling. Grows to 100 ft. One inch silvery blue to bluish green needles. Not all plants will have the bluish colored needles. Good for ornamental, colorful screen, windbreak, or Christmas tree. Ordinary soil, average moisture. Full sun. Slow growing.

RED SPRUCE: It forms a broader crown than other eastern spruces, still maintaining a narrowly conical form, and its needles are a brighter yellow-green. The bark is a gray-brown color on the surface and red-brown on the inside. When mature its trunk has a diameter of 1 to 2 ft. and it may grow to 150 feet tall in areas where humidity and rainfall are abundant.

WHITE PINE: Will reach 6 ft. in 6-7 years starting with three year seedling. Will grow to 100 ft. A five needle pine, soft, light green-blue four inch needles. Good for windbreak or hedge. Dry or poorly drained soils. Full sun.

CONCOLOR FIR: Also known as White Fir. Should reach 6 ft. in 8-9 years with three year seedling. Grows to 120 ft. Silver trunk and soft silver foliage. One of the best Christmas trees. Holds needles best of any short-needled tree. Needs good drainage.

SCARLET MAPLE: A handsome native tree growing to 50 to 60 feet, developing a round head of green leaves with silver undercover. Silver-gray bark, with leave turning brilliant crimson on fall. Grows well in all soil types

REDBUD: Grows 20 to 30 feet. Small flat-topped tree, producing pink blooms on bare stems in early Spring. Foliage is large and heart shaped, changing to yellow in the fall months. Does well in a protected location.

SWAMP WHITE OAK: An excellent tree which will grow in moist to swampy soils. Grows rapidly and can reach 60-80 feet tall. Trees start producing acorns in 20-30 years. In autumn, leaves turn brown, yellow-brown, or sometimes reddish.

CHERRY: Montmorency: Tart cherry variety. Fruit is bright red and medium size with clear, juicy flesh, great for pies and jams. Trees are self-fertile, winter hardy and very productive. Blooms with white flowers and ripens in late June. **Note: Semi-Dwarf variety will grow approximately 12-14ft. in height.**

PEAR TREE PACK: Includes one each: Harrow Sweet: A late season pear developed by the Harrow Research Station in Ontario, Canada. AC Harrow Sweet ripens approximately three weeks after Bartlett. This variety has shown very good resistance to fire blight. The fruit size and appearance are similar to that of Bartlett; however, AC Harrow Sweet does develop an attractive blush. The tree should be trimmed to maintain fruit size and avoid biennial bearing. **Shenandoah:** Another release from USDA and OSU, Shenandoah harvests approximately three weeks after Bartlett. Fruit size is large with traditional sub-acid pear flavor. Blight resistance is good and similar to that of Seckel. Shenandoah stores very well for up to five months without breaking down. **{Note: To get proper pollination, varieties should be planted no farther than 50 ft. apart. All Semi-dwarf.}**

APPLE TREE PACK: Includes one each: Enterprise: Developed by Purdue University, this is a late-maturing, deep red apple with good keeping qualities. Fruit is uniform and medium to large in size. Tree is vigorous and spreading, with good annual bearing habits. Enterprise is highly resistant to fire blight and cedar apple rust. It is becoming an important processing variety. **CrimsonCrisp:** Medium in size with a very attractive crimson red color over 95 percent of the surface. CrimsonCrisp has a very firm, crisp texture with a tart, complex flavor. The tree is very grower friendly with a spreading habit, fruiting throughout the tree on two-and three-year-old branches. The fruit matures in mid-season and will keep in cold storage for six months. **Initial:** A scab resistant variety developed at INRA Angers, France. A Gala x Redfree cross. Fruit has good size and has a red blush over a yellow background. Variety is prone to fruit drop making it an ideal selection for food plots. Tree is relatively non-vigorous and fruit is crisp with mild acidic flavor. Matures in late August. **{Note: To get proper pollination, varieties should be planted no farther than 50 ft. apart. Can expect trees to start producing a small number of apples in 3 to 4 years. Should be fully producing apples in the 5th year. All semi-dwarf and will grow 12-14 ft. in height.}**

BLUEBERRY PLANTS: Includes one each: These 2"-4" plug plants will grow into vigorous, upright plants that produce excellent yields of superb quality berries, and bear fruit one year after planting. **Blue Crop:** Mid-season. Highly frost resistant. Consistently overbears large, light blue berries. Up to 10 quarts of berries per bush. The most vigorous blueberry for northern climates. Sweet to tart flavor. **BlueGold:** Mid-season. The Gold Medal of flavorful berries. The attractive powder-blue berries are the firmest and will crunch in your mouth, releasing the sweet flavor with subtly hints of acidity. Twenty pounds of medium to large fruits will begin to ripen when it finalizes its bountiful harvest. Blue Gold's high antioxidant berries will harvest for 5 long weeks. Plant no further than 5 feet apart for pollinating purposes.

SHOWY NORTHEAST NATIVE WILDFLOWER & GRASS MIX: Little Bluestream; Sideoats Grama; Virginia Wildrye; Partridge Pea; Tall White Beardtongue; Smooth Blue Aster; Purple Coneflower; Marsh Blazing Star; Butterfly Milkweed; Lanceleaf Coreopsis; Blackeyed Susan; Oxeye Sunflower; Ohio Spiderwort; New England Aster; Maryland Senna; Blue False Indigo; Smooth Blue Aster; Browneyed Susan; Wild Bergamot; Wild Senna; Early Goldenrod; Narrowleaf Mountain mint; Orange Coneflower; Yellow False Indigo; Licorice Scented Goldenrod; Eastern Columbine; Gray Goldenrod; Hairy Beardtongue; Zigzag Aster; Golden Alexanders.

**2023 Tree Seedling Sale Order Form
Deadline to Order - March 24, 2023**

SEEDLINGS & SIZE		QUANTITY PER PACKET	# OF PACKETS	COST PER PACKET	TOTAL
Colorado Blue Spruce	10-18 inches	10		\$12.00	\$
Red Spruce	12-15 inches	10		\$12.00	\$
White Pine	15-20 inches	10		\$12.00	\$
Concolor Fir	8-16 inches	10		\$12.00	\$
Scarlet Maple	12-18 inches	10		\$12.00	\$
American Redbud	12-18 inches	10		\$12.00	\$
Swamp White Oak	12-18 inches	10		\$12.00	\$
Cherry (Montmorency)	4 feet	1		\$20.00	\$
Pear Tree Pack	4 feet	2		\$36.00	\$
Apple Tree Pack	5-6 feet	3		\$60.00	\$

Myrtle (Groundcover) is not being sold this year because it is not a native plant. We will look for an affordable native replacement for future years.

Blue Crop and Blue Gold Blueberry (1 of each per packet)

___ x \$15 per packet = \$ _____

Showy Northeast Native Wildflower & Grass Mix

(1 oz. covers approximately 200 square feet)

___ x \$4.00 per ounce = \$ _____

Bulb Packages (\$10.00 per package)

B ___ Everbearing Strawberry Plants (8 plants) perennial, spring - summer bloom before fruit. 10" tall

G ___ Spectacular Gladiolus Mix (10 bulbs) perennial, mid to late summer bloom

I ___ Stargazer Lilies (2 bulbs) Perennial, mid to late summer bloom

P ___ Peacock Orchids (18 bulbs) Perennial, mid to late summer bloom

Tree Shelter: This is a light plastic tube ranging from 4 - 5 feet in height. Protects seedlings from deer, rabbits, and vols. Increases survival rate and growth. **Not recommended for evergreens.**

4 foot tubex shelter \$5.50 each x ___ = \$ _____

5 foot tubex shelter \$6.50 each x ___ = \$ _____

Wood Stakes for Shelter Support or Garden Use (Hardwood)

4 foot wood stake \$1.60 each x ___ = \$ _____

5 foot wood stake \$2.00 each x ___ = \$ _____
