Cumberland, Perry, Franklin, and Fulton Regional LTSR – RFP – Questions with responses:

1. Will you define fee-for-service?  
FFS for the LTSR will be considered as a daily rate. We understand that in some counties, services are broken out and invoiced for services compensable under HealthChoices, however at the present time this Regional LTSR will consider FFS as a daily rate. This rate is calculated based on your budgeted expenditures divided by the # of individuals in the program divided by 365 days and is not a state set rate.
2. What is the available funding for startup and how will this be reimbursed for the first year?
  - ✓ \$3,759,614 is the actual available for start-up. This will be reimbursed under a contractual relationship using program funding based on expenses.
  - ✓ Following start up the program will move to a Fee for Service (FFS) contract paid with a daily rate, based on number of individuals receiving services.
3. If the provider does not currently have a property, what is the level of flexibility in year one?
  - ✓ From prior history, we believe that OMHSAS will work with us if for some reason the project is delayed, however every effort should be made to ensure start up is timely.
4. Is there a specific geographic area that should be targeted?
  - ✓ The program can be located anywhere within Cumberland, Perry, Franklin, or Fulton Counties; however the counties agree that the likely best location is somewhere in the Shippensburg area due to proximity to both Cumberland and Franklin Counties.

Revision 2: July 17, 2024

5. Will you please provide clarification on the Provider Warranties required?
  - ✓ Section 4.1.1 #5 Disregard this section.
